Subject: State of Arkansas Insert on Bridges

In a recent discussion with Bob Walters a reevaluation of the placement of the State of Arkansas insert on bridges on the Interstate and freeway system has been made. The decision has been made to place the insert on the bridge end turnbacks only (closed abutments as well as spill through designs). Do not include an insert on the piers as has previously been discussed. On the Texarkana and Hope jobs paint the insert red. On other structures across the State do not paint the insert unless we receive a specific request. Specific requests will be evaluated on a case-by-case basis.
